SUBJECT: Appliance Layout and Specifications

Enclosed is current appliance layout.

The following is a description of appliance system.

We do not feel the open cook top requires an exhaust system. This opinion has been recommended by the suppliers of the various appliance systems.

<u>ITEM</u>	<u>QTY</u>	<u>DESCRIPTION</u>
1	2	<p>Exhibition counters, each approximately 14'0" long x 3'-6" deep x 3' - 2" high. The tops are constructed of #14 gauge stainless steel, with a backsplash is to have louvers for full length and width, to help ventilate the base. The exposed ends are to have a 2" straight turndown, with a 1/2" high die crimped "V" edge, to prevent spillage. The base cabinets are constructed of #18 gauge stainless steel through-out and is mounted on a 4" high toe base. The toe base is to have louvers for height and full length. The lefthand side counter top is to be fitted from left to right with a three (3) compartment sink, each compartment is 14" x 22" x 12" deep with all vertical and horizontal corners covered on a 5/8" radius, constructed of # 14 gauge stainless steel, integrally welded to top, ground and polished smooth.</p> <p>Each compartment is fitted with a 1 1/2" duo-strainer, and two (2) T & S # B-201 faucets. To the right the top is to be fitted with a Wells model #200 T, drop-in two (2) compartment hot food well, thermo-controlled with the controls, built into the front apron.</p> <p>To the right, the top is to be fitted with a stainless steel hand sink, 12" x 15" x 12" deep integrally welded into the stainless steel top fitted with a 1 1/2 " duo-strainer and a T & S #B-202 faucet.</p>

<u>ITEM</u>	<u>QTY</u>	<u>DESCRIPTION</u>
-------------	------------	--------------------

The base cabinet starting on the lefthand side is to have two (2) enclosed storage cabinet with a stainless steel bottom shelf only. The cabinet are enclosed with hinged doors. The doors are constructed of stainless steel, double pan, with concealed hinges, chrome wire pulls and cylinder locks.

To the right there is two (2) sections of stainless steel angle slides, set on 3" centers, to accommodate 12" x 20" food pans, or 13" x 18", 1/2 size food. The slides are enclosed with hinged doors, as described previously.

To the right there is a enclosed storage cabinet with a bottom shelf. The cabinet is to be enclosed with hinged doors as described previously.

To the right there is a two (2) door refrigerator base, constructed completely of stainless steel, fully insulated with a stainless steel cove corner liner. The cabinet is to be refrigerated with copper coils, set in mastic wrapped around entire perimeter, and driven by a remote compressor is air cooled, with crankcase heaters and ambient controls, for use outdoors. The refrigerant gas is #R-22.

The doors are stainless steel construction, double pan, fully insulated with a stainless steel liner. The doors are self closing with chrome plated positive latches. The interior is fitted with a interior lite with the on/off switch located in the door mullion and actuated by the opening and closing of the doors. The refrigerator is fitted with a dial thermometer located in the center mullion.

The interior is to be fitted with two (2) chrome plated adjustable wire shelves, and a bottom mounted cabinet drain.

The righthand side cabinet is to be constructed the same as the lefthand cabinet, the top is solid # 14 gauge stainless steel, with rear and end risers and front edge as previously described.
